## AC-Electronic Current Transducer STWA1AH with analog output

## STWA1AH

Electronic current transformer
AC 0... 15 A - DC $0 \ldots 20 \mathrm{~mA}$

Part number:
S225579

The STWA1AH is a measuring transducer for AC currents 0... 15 A. Multiple loops of the conductor through the transformer reduces the measuring range correspondingly (for instance to $0 . . .5 \mathrm{~A}$ with three loops).
For the monitoring of currents of any level, the STWA1AH is simply looped into the secondary circuit of a large transformer with secondary 5 A (cable three times through the STWA1AH). Consequently, the output is proportional to the primary current of the transformer, e.g. 0... 100 A for a transformer with 100/5 A.
The analog output is isolated. The load should be $50 . . .300 \Omega$.
Monitoring range
Analog output
Adjustment time
Error (from $10 \%$ / Inom)
Error with other load
Temperature coefficient
Ripple at 50 Hz
Nominal frequency
Operating range
Error

Overload cap. continous / 10s
Rated ambient temperature range

Housing
Dimensions ( $\mathrm{h} \times \mathrm{w} \times \mathrm{d}$ )
Diameter for conductor Weight

Application: The STWA1AH makes it possible to monitor the value of an AC current. The output signal can be evaluated or displayed with components with analog inputs, e.g. ZIEHL TR210, STW1000/V2 or MINIPAN ${ }^{\circledR}$.

- current-proportional analog output DC $0 \ldots 20 \mathrm{~mA}=$ AC 0... 15 A (isolated)
- electrical connection via screwless pluggable terminals
- no supply voltage required
- DIN-rail-mount or with screws
- plug-in current transformer ( $\varnothing 11 \mathrm{~mm}$ )
- max. overload 100 A continously, 300 A / 10 s
- plug-in current transformer, easy assembly

$42 \times 36 \times 56 \mathrm{~mm}$ 11 mm
app. 90 g

[^0]
[^0]:    1 Housing
    2 Clip for DIN-rail (removeable)
    3 Terminal (pluggable)
    4 Wall-mounting (M4)
